## Your Truck Is Your Home.

With a Frigette APU, your living environment in a truck sleeper can be more tolerable. Relax in comfort as your APU system showers you with cool air on a hot summer's day or soothing heat on a cold winter's night.

Wherever you go, the convenience of plug-in power means you can bring a microwave, toaster oven or coffee pot along for the ride. Enjoy the benefits of reduced restaurant costs!

Sleep better knowing you are saving BIG from wasteful fuel expenses related to parking lot idling. Who needs 450 h.p. to watch TV and make popcorn?

Times are changing, and so are you.

A Frigette can help - in a 'No-Idle' world.

*Avoid steep idling fines!  
Tough idle restriction laws are increasing across the US and Canada. The Frigette APU offers compliance in almost every location.*
